

STREET/STRIP SUPERCHARGER PULLEYS

EFFECTIVE DATE 03/29/19

STANDARD

Standard pulleys come with shoulders on both sides, and a shaft that is also flush with the shoulders.

OFFSET

The shaft on an offset pulley extends past one shoulder, to position the belt farther away from the supercharger.

SINGLE-SHOULDER

These pulleys have a shoulder on only one side of the pulley to accommodate tighter fitment.

COG

Cog pulleys have "teeth" instead of ribs, to avoid belt slip. Used for a variety of vehicles and hp levels, typically for racing/off-road.
